

The SimpleLegal Legal Operations Platform

Choose modern and upgrade your legacy ELM

Today's legal teams are instrumental in informing business decisions and work closely with the c-suite to protect and grow the business. While legacy ELM software tracks invoices and provides some visibility into departmental performance, in order to strategically inform the business, legal teams must upgrade to a more modern and intuitive legal operations platform that provides total transparency into matters, spend, and vendors.

SimpleLegal is the trusted platform for efficient legal operations. More intuitive and easier to use, SimpleLegal combines matter management, spend management and e-Billing, vendor management, and knowledge management in a single, unified platform – in addition to providing key business insights through robust reporting and analytics.

The Choose Modern Advantage

Financially Focused

Complex billing guideline and AFA enforcement, automated accruals, and budget requests provide predictability for business-minded teams.

Highly Configurable

Unlimited custom attributes that can be searched and reported on means access to data and insights that drive your department and business forward.

Greater Benefits & Outcomes

We work closely with our customers to identify how legal teams interact with our solution, constantly innovating to create greater benefits and outcomes.

Easy to Learn for Law Firms

Law firms love using SimpleLegal thanks to our intuitive UI. This means you don't have to worry about additional training and spend time on strategic initiatives.

Reliable Integrations

Standard integrations and a robust API create connectivity with other systems and departments, allowing SimpleLegal to grow alongside your department.

First Rate Implementation

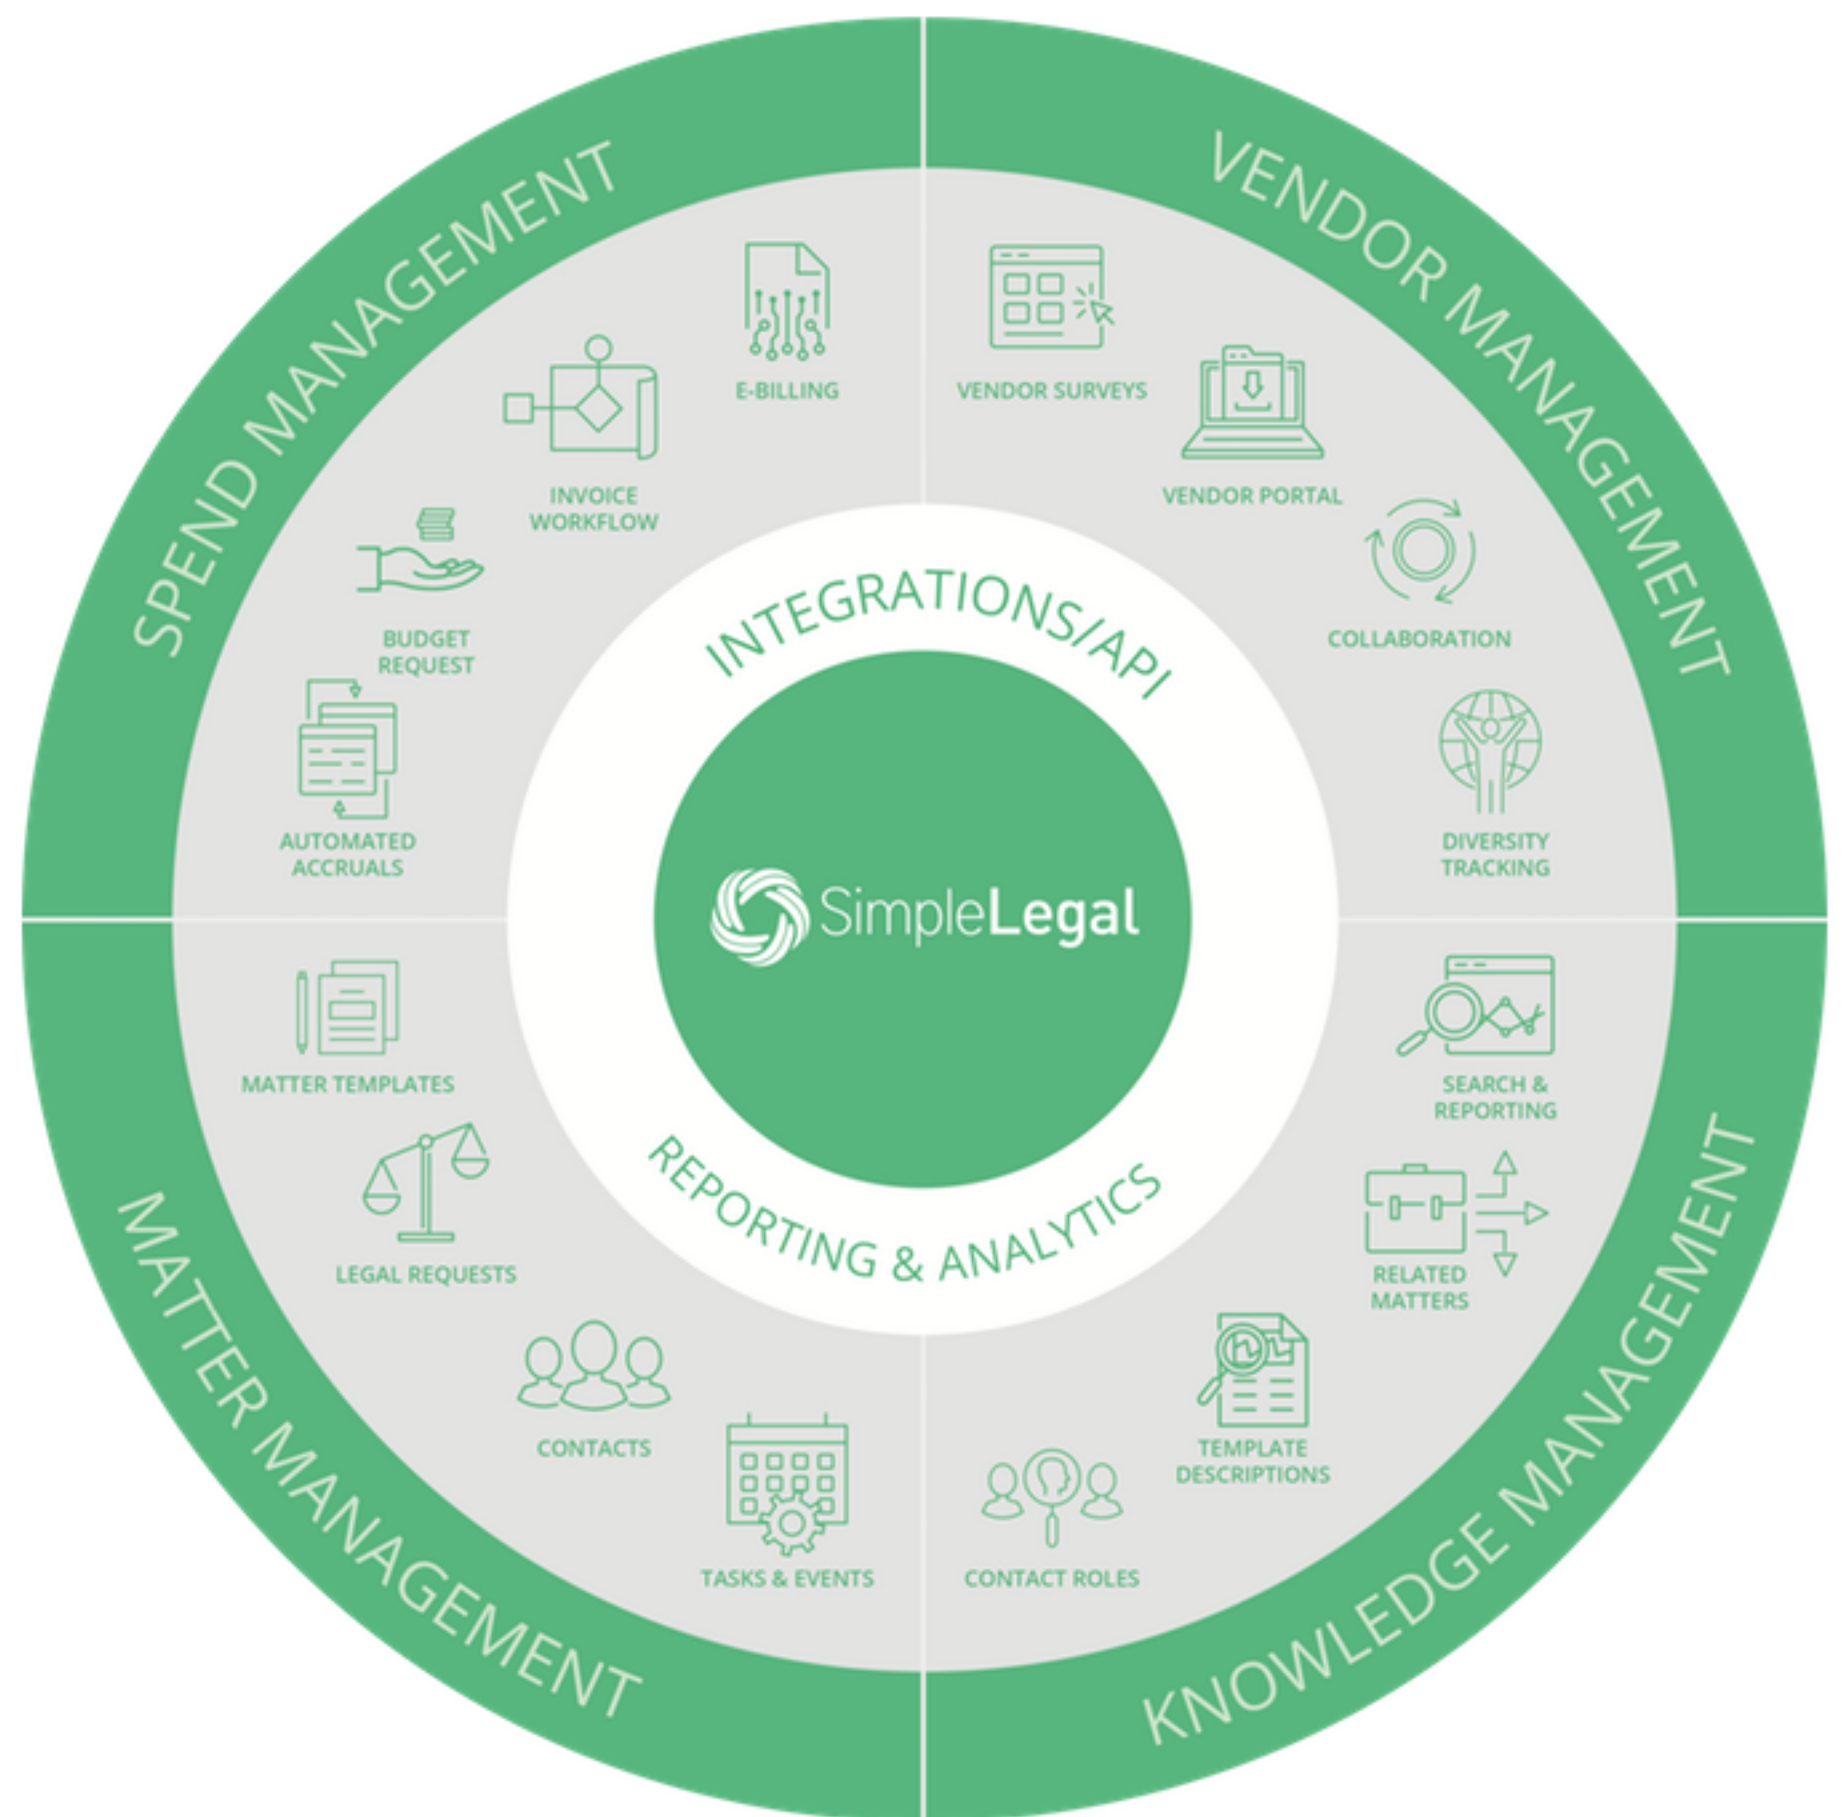

Legal has evolved over the years and a one-size-fits-all approach doesn't work. We partner closely with you to ensure you realize value as soon as possible.

Your System of Record for Legal Operations

Risks of Becoming Entrenched in Legacy Legal Software

- 1. Lost credibility and purchasing power** if you're paying for a solution that's not providing tangible results.
- 2. Downtime and broken instances** due to software upgrades, causing inconveniences for all users from in-house attorneys to outside counsel.
- 3. Leveraging outdated best practices** that might have been relevant in the past but are no longer conducive to the speed at which today's legal teams must operate.
- 4. Lack of adoption & user satisfaction** due to a solution that provides so much functionality that users can't learn the platform and use it to its maximum potential.
- 5. Inability to effectively scale** because the legacy solution forces the legal team to turn to their technology vendor to make any changes, big or small.

Manage more than your matters. SimpleLegal is the first true legal operations platform, providing legal teams of all sizes, in all industries, with the necessary tools to effectively manage the *entire* legal department.

Jonathan Hawkins
Vice President & General Counsel

"Working with SimpleLegal was one of the most critical things we did in terms of getting better visibility into how the company was spending money on external counsel and other legal services. They understood what we cared about and provided us an intuitive platform that could generate comprehensive reporting. All while giving us the biggest bang for our buck. It blew me away how much value we received from their system and how easy their tools were to use."

Ryan Murphy
Director of Operations, Legal, Public Affairs and Global Records Management

"LyondellBasell is a business that looks to leverage technology to meet a very high standard of efficiency. Managing the moving parts of a global legal department is complex, with potential for duplication of work and increased legal expenses. We chose SimpleLegal to enable us to gain visibility, manage productivity and legal content, collaborate with vendors, and reduce overall legal expenditures."
